PRECISION IRRIGATION SPRINKLERS

*Nodolini Sprinklers is proud to present its complete range of products, fruit of continuous research developed through over 60 years of activity. This has allowed us to combine the solidity of our irrigator with high performance and extraordinary lightness. We are certain of a product which will effectively satisfy the modern needs.*

## PRECISION IRRIGATION SPRINKLERS

## CARATTERISTICHE FEATURES

## VANTAGGI DELL'IRRIGATORE A TURBINA

- Tutte le parti meccaniche sono interne e protette.
- Il tubo di lancio conico garantisce maggiori prestazioni.
- Privo di freno , causa di problemi nel tempo, lavora perfettamente anche su terreni in forte pendenza ed anche con alte pressioni (15 Atm – 220 psi)
- Funziona con un angolo minimo di 4 gradi.
- Il rompigetto dinamico ad interferenza regolabile, assicura una corretta uniformità di pioggia in tutte le situazioni , anche con basse pressioni dove gli altri irrigatori normalmente hanno abbondanza di acqua negli ultimi metri della gittata e poca nei primi.

## ADVANTAGES OF THE TURBINE SPRINKLER

- All mechanical parts are *internal and protected*.
- The *conical barrel provides greater performance*.
- *Without brake, which causes problems over the time, it works perfectly even on steep slopes and at high pressures (15 Atm - 220 psi)*
- *It works with a minimum angle of 4 degrees.*
- *The dynamic jet-breaker with adjustable interference, ensures a correct rain uniformity in all situations, even at low pressures where the other sprinklers normally have plenty of water over the few last meters of the throw and little in the first ones.*

## PRECISION IRRIGATION SPRINKLERS

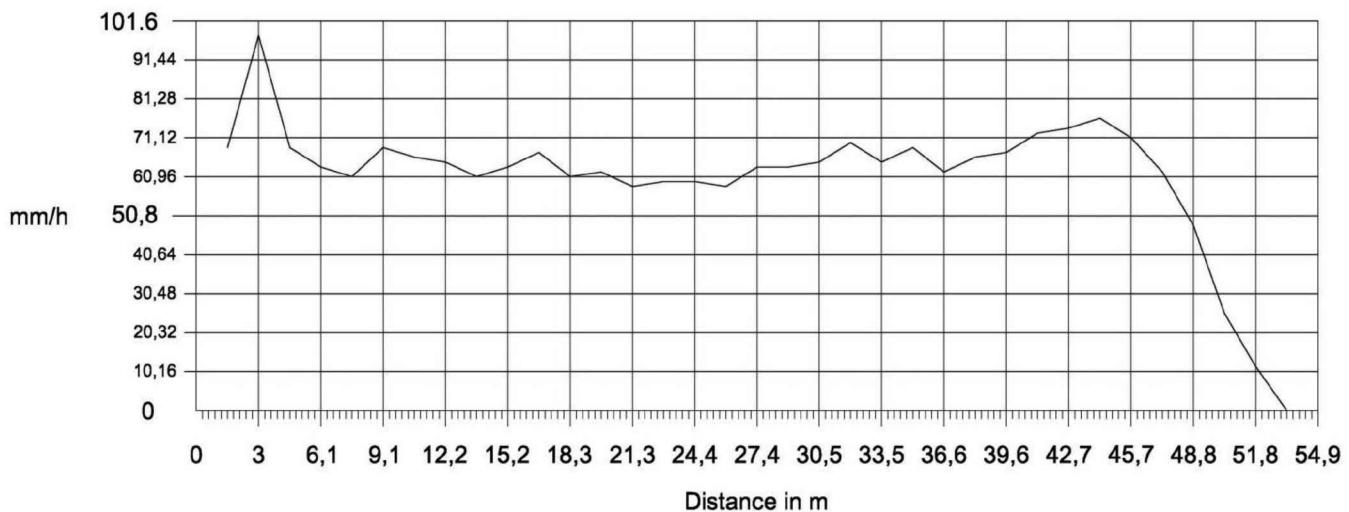

Qui sotto il nostro modello S60 E / S60 con un boccaaggio diametro 24 mm e con una pressione di 6 Atm (88,2 psi) sull' irrigatore. In questa situazione abbiamo ottimizzato l' uniformità di bagnatura con un' interfe- renza del rompigetto di 3,5 mm.

*Below is our model S60 E / S60 with a 24-mm-dia- meter nozzle and a sprinkler pressure of 6 Atm (88.2 psi). In this situation we have optimized the watering uniformity with a jet-breaker interference of 3.5 mm.*

### Christiansen Uniformity Coefficient ( $C_u$ )

$$C_u = 100 \cdot \left( 1 - \frac{\sum_{i=1}^{n=1} |h_i - h_m|}{n \cdot h_m} \right)$$

$$C_u = 100 \cdot \left( 1 - \frac{225,64}{34 \cdot 62,98} \right) = 88\%$$

| Christiansen Uniformity Value ( $C_u$ ) |                |
|---|----------------|
| > 87%                                   | = excellent    |
| > 83%                                   | = very good    |
| > 79%                                   | = good         |
| > 75%                                   | = satisfactory |
| > 70%                                   | = poor         |

### Distribution Uniformity Coefficient ( $D_u$ )

$$D_u = 100 \cdot \left( \frac{h_{lq}}{h_m} \right)$$

$$D_u = 100 \cdot \left( \frac{53,53}{62,98} \right) = 85\%$$

| Distribution Uniformity Value ( $D_u$ ) |                |
|---|----------------|
| > 85%                                   | = excellent    |
| > 80%                                   | = very good    |
| > 75%                                   | = good         |
| > 70%                                   | = satisfactory |
| > 65%                                   | = poor         |

## PRECISION IRRIGATION SPRINKLERS

# S70 SUPER - 25°

# S70 SUPER - 25° REVOLVING

# S70 SUPER - 22°

*LONG THROW*

*Big EUROFLANGE connection (diameter inlet 80 mm)*

*Long range turbine sprinkler designed to obtain maximum output with medium power systems.*

- Turbine sprinkler
- Conical pipe: high performances
- Perfect functioning on steep terrain
- No vibrations
- No break
- Intermittent jet-breaker adjustable for better uniformity of the rain
- Suitable for irrigation of delicate crops
- The sprinkler can operate with an angle of just 4°
